Principals' instructional leadership may support the degree to which teachers work together to improve instruction, and together leadership and teacher collaboration may contribute to school effectiveness by strengthening collective efficacy beliefs. We found a significant direct effect of leadership on teacher collaboration.

Summary □ Theory analysis consists of systematically examining a theory for its origins, meaning, logical adequacy, usefulness, generalizability/parsimony, and testability. □ Each step stands alone in theory analysis and yet each is related to the other. □ Each of the steps are interdependent on the results of the others. □ The steps of theory analysis is iterative:

one must go back and forth among the steps during the analysis in addition to moving sequentially through them.
