following terms and give two examples of each: a. mechanical digestion b. chemical digestion 3. Label a diagram of the digestive system. 4. Trace the path of food during digestion. 5. Give functions of the digestive structures. 6.

## **Study Guide - Duchess Park Biology 12**

Biology 12 - The Digestive System - Chapter Notes In a nutshell... • The body uses a variety of small molecules (amino acids, fatty acids, glucose) for its metabolic needs. Food is mechanically and chemically broken down into these molecules during digestion, after which they can be taken up by body cells through the separate process of absorption.
