Solution: (a) Pick any 2 of the 12 people to make the 2 person team, and then any 5 of the remaining 10 for the first team of 5, and then the remaining 5 are on the other team of 5; this overcounts by a factor of 2 though, since there is no designated "first" team of 5. So the number of possibilities is $\frac{12 \cdot 10 \cdot 5}{2}$

Harvard scientists rigorously investigate the effects of pollution, climate, migration, and inequity on human health. We seek to understand the planet's complex web of physical environments, and the workings of life in all species. Our research empowers people everywhere to make decisions based on facts, and to act with reason in addressing the consequences of climate change.

Environment | Harvard University

Dealing with climate change means accepting tough tradeoffs: giving up certain energy sources, products, and conveniences, all of which have economic impacts. Politicians balk, but there are solutions. Roland Kupers turns to the new science of complexity to show how we can untangle a knotty global economy and start making progress.
