Clinical Decision Making Flashcards | Quizlet

Clinical decision making is the process by which we determine who needs what. While not exactly arbitrary, this exercise can be quite subjective. clinician compiles their own data (hence the emphasis on learning to perform an accurate H&P) and then constructs an argument for a particular disease state based

clinical decision making emphasizes consideration of the “clinical state and circumstances of the patient” as a key element.⁵ Such an individualized approach to injury prevention and treatment decisions needs to be supported by research evidence that provides some basis for predicting the outcome that will ultimately be realized by a patient who possesses a given set of personal attributes, pathophysiologic indicators, and routine physical demands.

Cohort Study Design: An Underutilized Approach for ...

After you have made your selections in the Information Gathering section, you will then be directed to the Decision Making section. This is where you must take what you know from the information given and make the best possible decision for the patient. Usually, you will be asked to select the best of 4–5 options.

Medical-Surgical Nursing, 9th Edition - 9780323444194

Emphasis on clinical judgment teaches you to develop skills in clinical reasoning and clinical decision-making when applying concepts to clinical situations, with Clinical Judgment Challenge questions throughout the chapters. An emphasis on prioritization stresses the most important patient problems and nursing interventions, with patient problems presented in a single prioritized list of nursing diagnoses and collaborative problems. $\text{ÅfÆ'Å†â€™ Åfâ€} \text{Åçâ,} \neg \hat{a}, \text{ç ÅfÆ ...}$
