Hallucinations

Hallucinations are sensations that appear to be real but are created within the mind. Examples include seeing things that are not there, hearing voices or other sounds, experiencing body sensations like crawling feelings on the skin, or smelling odors that are not there. Hallucinations can be a feature of psychotic disorders such as schizophrenia and are also very common in drug-induced states ...

Absinthe has gained a romantic, nearly mythological reputation over the years. La Fée Verte—the Green Fairy as it is sometimes known—is entwined with stories of writers, artists and bohemians, especially those of the belle époque and Roaring Twenties. But between the torrid legends of it inspiring hallucinations—even madness—there is an important and historic spirit.

What Is Absinthe? - Liquor.com

Drugs called antipsychotics help manage hallucinations, delusions, and disorganized thinking. One example is clozapine (Clozaril), but a healthcare professional may be able to recommend other options.
