IRIS (Include, Respect, I Self-Direct) Participant Handbook
With this feature, you can use face, fingerprint, or iris recognition to logon. Facial recognition involves the system recognizing your face by reading characteristics, such as the distance between your eyes, ears, and so on. Iris recognition involves the system looking at the pattern in one or both of the irises in your eye. When you sit in front of the camera on your computer, the characteristics of your face or eye are compared to what's on file.
