Hey Fellas! I am back to give you a daily dose of useful information. Today, I'll uncover the details on the Introduction to Arduino Due. It is a microcontroller board based on Atmel SAM3X8E, 32-Bit ARM microcontroller. It is developed by Arcuino.cc with the intention to provide an easy pathway for the beginners to get a hands-on experience with the module without any prior technical knowledge.

Introduction to Arduino Due - The Engineering Projects

Introduction. The sense of touch is an important sensory channel in many animals and some plants. Our senses inform to us when our hands touch something. Computer input devices are indifferent to human contact as there is no reaction from software in the event of making, maintaining or breaking physical contact like touches or releases.
