Mastering Aperture, Shutter Speed, ISO and Exposure

The Exposure Triangle: Mastering Aperture, ISO, & Shutter Speed Aperture. The aperture controls the size of the opening in the lens, affecting how much light hits the sensor when you... Shutter Speed. Much like the name suggests the shutter speed determines how long the shutter stays open for. The ...

Mastering Exposure: Aperture, ISO, and Shutter Speed ...

Most cameras feature an aperture priority mode. This is like a step between manual and auto settings, in which you can manually set your aperture and let the camera choose your shutter speed and ISO accordingly. Not only is this feature hugely helpful for beginners, it's very convenient for photographers of all levels. Effects of shutter speed. Just like aperture, shutter speed has a significant impact on how your photos look beyond pure exposure. Shutter speed has both functional effect ...

Mastering manual exposure: effects of adjusting aperture ...

A photograph's exposure determines how light or dark an image will appear when it's been captured by your camera. Believe it or not, this is determined by just three camera settings: aperture, ISO and shutter speed (the "exposure triangle"). Mastering their use is an essential part of developing an intuition for photography.

Camera Exposure: Aperture, ISO & Shutter Speed

Try it - set your aperture to the same number you wrote down earlier, multiply your shutter speed by two and set it to that number, then change your ISO to 400. It should look the same as the first image you took earlier. If you were to increase the ISO to 800, you would need to again double your last shutter speed from 1/250 to 1/500.

Understanding ISO, Shutter Speed and Aperture - A Beginner ...

A high ISO leads to a brighter image, whereas a low ISO will be darker. Aperture, shutter speed, and ISO all affect exposure in similar ways, but whereas the first two have creative side effects ...

Photography 101: Exposure, aperture, shutter speed, and ISO

The higher the ISO, the faster the shutter speed, and the brighter the photo. The lower the ISO, the slower the shutter speed, and thus the darker the photo. The way to imagine ISO: imagine the sensitivity of your eyes to ambient light.
