book are inspired by real situations and are designed to encourage the reader to get low cost and fast access of books.

Web Page Resolution

Most websites range from 720 to 1,000 pixels wide. If a website visitor has his monitor set up to 800 pixels or more and the page is wider than 720 pixels, he will have to scroll the screen to the right in order to show all of the information. Forcing a visitor to scroll either left or right reduces the likelihood that he will continue to use your website.
