Blown away by wind farm "capacity" versus actual output. Promises, promises. We're constantly being blown away with the growing capacity of wind farms to provide renewable energy, but they've yet to produce anywhere near their projected capacity.

Blown away by wind farm "capacity" versus actual output ...

It's funny: when you say you sponsor wind power elsewhere in the state, as we do, there is always someone to say "Don't be silly: that power isn't running your appliances, your power comes from whichever power plant is closest and connected to your section of the grid." So I admit that, and I get the above response. We're using hydropower.
